CANADA LABOR LAW INTRODUCED IN BAY

setts Association Calls for Official Investigation of Every Strike.

ARBITRATION IS AIM RESULT OF RECOUNT

Present Conciliation Board to Give Place to New One Act Passes.

Industrial Disputes, has just been pre- tion. sented to the Legislature by its secretary, Myron E. Pierce.

a state board of labor, whose duty it acquiesce. shall be "to aid in securing industrial" According to the recount by the elec-

A "dispute" is defined as an industrial controversy involving or threatening to involve directly or indirectly not less than 25 persons in the same general occupation. A "lockout" is a closing of a place of employment, or a suspension of work, or a refusal to continue to employ or to resume the employment of a group or class of employees with a view to compelling terms of employment. A "strike" is a cessation of work, or a concerted refusal to continue to work or the city resume work, to compel an employer or to aid other employees to compel their employer to accept terms of employment.

Ine employer who declares a lockout before having the dispute investigated, is to be fined not more than \$10 a day for each employee locked out, and not less than \$100 for each day of the lockout. The employee who goes on strike without first resorting to a board of investigation may be fined up to \$50 a day. Anybody who incites either employer or employee to a lockout or a strike before investigation may be fined

Employers and employees alike shall give at least 30 days' notice of an in tended change affecting condition of employment or with respect to wages or hours. The party unwilling to accept Personnel of the Joint Probe Majority of 40 Regardless of such a change is to apply for a board of investigation. This may consist of the state board of labor itself, if the parties so agree, or it may be a special board of three members, one to be named by each side, and the two thus named to choose a third, or if they cannot agree he is to be named by the state board. Members of the state board may be named for special boards, and the chairman of the state board is to serve as chairman of special boards when he is acceptable and

Hearings are to be public unless either party of the board prefers a private hearing. It is argued that it has been found in Canada that conciliation and committee probably will meet the first reached by private, informal hearings. out the course they will pursue. Attorneys are not to take part unless both parties and the board consent. Due provision is made for the appointment of experts to advise, for the summoning of witnesses, and for the production of books and papers. "A board may accept, admit, and call for such evidence as in equity and good conscience it thinks fit, whether strictly legal evidence or not says the measure.

The findings and recommendations of a board are to get full publicity, in accordance with an important purpose of the law, which is the informing and creating of public opinion. If the parties do not accept the recommendations, then they may lockout or strike as they please.

ORDERS BIG FUND EQUALLY DIVIDED

A fund of \$10,000 left by John Q. Williams to his granddaughter, Marjorie M. Atkins, who recently passed away at the home of her mother, Marjorie Atkins, in New York, will be divided under the laws of Massachusetts equally between the mother and the father, Edward Atkins of Michigan, according to the decision of the full bench of the supreme court today. The father sought to have the fund of \$10,000 distributed under the get the entire amount.

SOUTH STATION LOOP PREPARES TERMINAL FOR ELECTRIC PLANS

Series of Tracks With All Essential Facilities Now Runs Under the Platform in Use at Present.

READY FOR TRAINS

Revived Agitation for Abatement of Smoke Nuisance Makes Action an Imminent Possibility.

Expectation of discussion and the pos ibility of decisive action by the present Legislature on the electrification of the suburban train service of Boston turns attention to the existing provisions for just such an arrangement in the doubletrack loop which was constructed at the time of the erection of the South terminal station beneath the main track level now in use. This provision is evidence of the fact that the engineers who drew up the plans for the union terminal foresaw the inevitable demand of the future for suburban electrification and made accommodations accordingly.

It would seem from the widespread agitation from those sections of the city complete, and the connections with the

BOSTON MEN FORM **CLUB TO FIGHT THE** HIGH COST OF MEAT

Attorney Edward M. Shanley Is Named President and Lawyer William Scharton the Secretary.

PLAN HARD BATTLE

Steps Already Taken to Hold a Public Mass Meeting in Tremont Temple or Faneuil

BULLETIN.

CLEVELAND, O .- Despite the growth of embership of the meat boycott movement to 30,000 pledges, the price of sirloin steaks advanced two cents today.

Boston today organized a movement for the purpose of fighting the increased meat prices. Steps have already been taken to secure either Tremont Temple or Faneuil Hall for a public mass meet ing within a week. The matter will prebably be taken up at the coming Saturday's meeting of the Twentieth Century Club, Max Mitchell, one of the leading philanthropists in Boston, commends the movement and announced his intention of forming an auxiliary organization. Attorney Edward M. Shanley, with an office in the Carney building, is the presi-

dent of the new club. Attv. William Scharton is the secretary. He will handle all correspondence. His address is 43 Tremont street. It was voted that the new club should work to inaugurate and develop a general boycott on meat stuffs for the pur-

pose of compelling the beef trust to offer eat at reasonable prices. Secretary Chandler of the Twentieth entury Club stated today that he would be pleased to get in touch with the first

on subjects of interest to motorists.

THE TURNER COLLECTION Most people are aware of the fact that there is a considerable number of Turner's works in the National Gallery Turner, the greatest of English landscape painters, was as active and ener getic in his work as any man of his day, and this is clearly proved by the great collection of his drawings of which there are 19,000, together with the 100 finished and 182 unfinished paintings, which are now the property of the nation. A great many of these are arranged in portfolios, and are of so delicate a nature that they are handled by none but responsible officials. The public have, up to the present, seen only a fraction of this however, then distinguished himself as vast collection of his works. When, however, the new Turner Gallery at Millbank

Leading Events in Athletic World Wale Track Prospect

MANY PLACES WILL HAVE TO BE FILLED ON YALETRACK TEAM

The Pole Vault and Weight Events Appear to Be Most Promising Field for Making Points.

NEEDS SPRINTERS

NEW HAVEN, Conn. The loss by graduation last June of some of Yale's best track men greatly darkens the outlook for a victorious team this spring. Although the team will be strong in the half-mile and field events, its lack of any very promising material for the distance runs and dashes makes the prospect rather gloomy. About 55 candidates, however, are working on the squad daily and both Trainer Mack and Captain Nelson are optimistic about being able to develop men who will be capable of strengthening the weak spots.

Yale's strongest point this year will again be the pole vault. Even though Dray and Gilbert are no longer in college, she has in Captain Nelson one who is well capable of upholding Yale's old athletic tradition of always having champion pole vaulters. Robert Gardner, the former Andoves pole vaulter, and captain of last year's freshman track team, should also be a prominent factor in this event, for he has been clearing-the bar at over 11 feet in the gymnasium

With Cooney, Andrus, Goebel and Kilpatrick to look after the weight eyents. there is no doubt but that Gale should win a majority of the places in both the Lernmer throw and shot-put again. In the Lernmer throw Cooney is the best man that has been in college since FOUR TEAMS LEFT the days of T. L. Shevlin, while both Andrus and Goebel stand slightly behind him. Thus far this winter Kilpatrick seems to be the best in the shot-put, showing last year's form, E. H. Coy, cap-clubs were represented in the first round tain of the football team, will again give of the annual national championship at up baseball for track, and should be one racquet doubles at the Racquet and Tenof the likely candidates for the shot-inis Club here Thursday. The surprise

name in both the low and high hurdles. The schedule: Since then, however, he has not run either of them. It is possible that he may again try for this event, as he seems to be the most promising man on the squad. Kilpatrick is also Yale's best broad jumper and should equal his former record I again this year.

In the high jump Yale will again have both Confield and Coy of last year's yarsity, both of whom are capable of clearing the bar at close to six feet.

The squad has been working steadily in the gymnasium for the past two weeks in preparation for the Pastime Athletic Club's indoor meet at New York with Harvard. About 25 men in all will work of the season. be taken to Boston with the team.

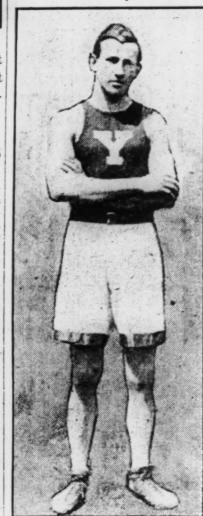

COLLEGE ATHLETES TO MEET.

NEW YORK-A meeting of the delegates from all the colleges and universihold in New York. The chief subject to be decided is the place where the intercollegiate track meet will be held this spring. Last year it was held at Cambridge and this year's meet will undoubt edly go to Franklin field, Philadelphia.

THOMAS BALL.

By Jason Rogers.

In the two illustrations showing Tom Sherlock is a good example of this school.

Ball and Alec Herd at the finish of the which finds rather exaggerated devotees full drive no one can fail to be struck in Coltart and W. E. Reid, who carry the fat that the stringles of the by the fact that the attitudes of the hands are almost at their left ear and players are almost identical, says Silver the club pointing downward at an angle

ALEXANDER HERD.

rather past the point directly facing the line of the hole. The club is behind the head, almost horizontal, and it has swung round till it is almost at right angles to the line of flight. The hands are well away from the shoulder, so that more than half the shaft appears on the left hand side of the player's head.

No attitude could be more characteristic. It is essentially the finish of a player who has got his body "well into it," not by swaying, which was at one time a fault of Tom Ball's, but by swinging round on the backbone as an axis. It is a finish, moreover, which almost implies a somewhat horizontal swing, because with a perpendicular swing it is scarcely possible to follow through with the hands so well round

Now it may be very true, as some one has sa'd, that the motion of the club after it strikes the ball can by no possibility affect either its direction or its swings up or down before the club-head comes in contact with the ball, provided the said head is moving in the proper direction and with sufficient speed for the last second or so before the ball is struck. The fact remains that if a player not to prove anything of a stumbling may be indicated either by an uneven fails to swing properly-and such failure down stroke or a clumsy follow through -he cannot get his club to move cor-

You see this on the course every day. tance off, so that you cannot see the Indications point toward the selection invariable mean a well-hit ball, it is inpleted stroke hits the ball fairly and

squarely. The follow through makes the style. Cortrast with the method of finishing employed by Ball and Herd the characteristic finish of Braid with the hands low and the club pointing toward the sky at about the same angle as a soldier carries his rifle. Or look at Ray, whose style is similar to Braid's, only more so. for he finishes with the club almost perpendicular. This is the attitude of the ordinary player who has purposely spared his shot, and it bears out the common has started practise for the coming sea- saying that Braid seldom attempts to hit

with the strength that in him is. Ray is credited with having the faces cease blaming the umpire for not an- lege with the exception of Captain of all his wooden clubs made to lie away, nouncing changes of which he was not Dickay '10. The intercollegiates will be in order to counteract his tendency toward aware. The new rule, moreover, will held this year at Newton, Mass., at the hooking. With so incomplete a follow through as he adopts, it is easy to see that any natural tendency toward pull-

CHICAGO TO ADOPT A NEW COURSE FOR HER SCHOOL WORK

CHICAGO The board of education's 'Chicago course' will be incorporated in the city's public schools about Feb. 1. The course will take the place now occu. sied by algebra in the eighth grade.

Most Chicagoans know little about the sity in all its various uspects and the poard of education thought it a good plan to teach the children about it before her left the elementary grade schools. The board members think the new course will prove to be one of the best as well as one of the greatest innovations ever attempted in the school curriculum.

The course includes history, geography. industries, social aspect and civic affairs, he last named to receive the most em-

Under the topic of history will be studied the following: Settlement and exploration of the French in the old Northwest; George Rogers Clark's expelitions: the ordinance of 1787: Ft. Dearborn and the war of 1812; Illinois as a state and the part it played in the Mexian and civil wars; the world's fair of

NEW APPRAISERS STORES DELAYED

The work of constructing the new appraisers stores on the site of Packard's follows: wharf, corner of Atlantic and Northern avenues, will not be started before the spring .- according to information obtained at the custom house.

The local customs officials, and especially Chief Appraiser Hodges of this city, are urging the treasury department to begin the work on the buildings. The old appraisers stores are inadequate for the rapid growth in the customs business at this port

The brick buildings on the Atlantic avenue site have been razed and the ground has been surveyed and put in Over Next Administration

petition for the establishment of a metopolitan commission to consist of the chairman of the railroad commission and the chief engineers of the harbor, land and the transit commissions to acquire the holding company.

Representative Mellen of Worcester has introduced a bill to allow Sunday baseball when 500 citizens of a city or 100 of a town so petition, and the city council or the votes of the town ratify it. Representative Ducey of Boston has introduced a bill requiring savings banks to file a more, detailed account of their assets with the bank commissioner when making their reports.

Other bills presented were for amendments to insurance laws; experimental work in growing cranberries; amendments to the game laws; relating to the joint use of tracks by street railways; the heating of street railway cars; antipass bills; pensions for district police members; to incorporate the New Yorkand Boston automobile boulevard; to determine by lot the position on the ballot of the names of candidates for the same office in cities of 100,000 or more; for an annual state fair; to pay the franchise tax to the city or town where the business of the corporation is done; that Boston shall pass on the license only in years when a mayor is elected; to allow the sale of liquor in hotels in no-license places; to amend the minors law so that a liquor seller shall be liable ony when he has reasonabe cause to believe that the purchaser is a minor; to require Boston to vote on license at the annual state election; to require the hearings of the Boston police licensing board to be public; to require the trials before the Boston police trial board to be open to the press; to prohibit the increase of telephone charges or impairment of service without a 60-day notice to the highway commission, a public hearing, and. in case of adverse recommendation, a postponement for six months in the effect to establish a state ance fund of \$25,000 annually until it reaches \$200,000 (for state buildings).

The House concurred Thursday with the Senate in referring the question of invest in the bonds of the Boston Holding Company to the committees on railroads and banks and banking, sitting jointly.

Chairman Ellis of the Boston school the improvement of the city schools, the chief of which asks for funds to replace England were all prepared to boom his Hamilton school 25, Montrose school 14, old buildings. The bill asks that the city candidacy to the limit. may be allowed to borrow \$2,500,000 during the next three years.

the Massachusetts highway commission contended that in the case where an employee was doing good service and deserved a raise in wages, there should be some way in which it could be done without compelling him to take an examination which perhaps he could not pass, even though he had proved himself capable of doing the work.

The Employers Association of Massachusetts at its sixth annual meeting voted to present to the Legislature a bill modeled on the Canadian bill for the prevention of strikes. This bill is to be called "the industrial disputes investigation and publicity act," the chief objects of which are to secure an investigation before a strike or lockout is ordered. and in this investigation to secure publicity of the facts. There is to be no compulsory arbitration, simply an impartial finding. After the investigation if the parties wish to go on a strike

State Agricultural Societies Point Out Opportunities to Be Found Where Men Most Neglect Them.

TRENTON, N. J.-New Jersey farmers are rapidly becoming rich in spite of pests, it was reported in the opening sesion of the thirty-seventh annual meeting of the state board of agriculture in the State House. Farmers from all parts of the state attended, and the meeting is expected to be one of the most important It provides that a legislative committee in the history of the board. It was shown that more than a million acres await development in South Jersey, and that New Jersey really needs more farmers. The meeting will end today. Secretary Franklin Dye said

yields of the farms in crops and milk amounted during 1909 to \$59,357,955. This was an increase for the year of \$1,-

With the high_prices that prevailed, been as good as those in 1908, would have made the total gross returns \$4,506,-Herbert F. Keith filed in the House a 982 in excess of 1908. Even with the reduced yield, the high prices prevailing left the farmer ahead of the game.

The secretary also pointed out that there are more than 1,000,000 acres of land awaiting development in the southstock looking toward the supplanting of ern part of the state. The greater part of this, Dye said, could be made to produce agricultural crops and small fruits, especially grapes, at a profit.

> Bay State Man Declines Candidacy for National Grand Army Commander

COL. J. PAYSON BRADLEY.

O^N account of unexpected business responsibilities, Past Department whether or not the savings banks could Commander J. Payson Bradley has decampment of the Grand Army of the Republic in Atlantic City this year. board has presented several bills for Post 2, Department of Massachusetts, to 89, Franklin school 65, Warren school 48, dean of the college of liberal arts and make a semi-official tour of inspection very small beginning in a little more ery and as a confection at holiday time this effect. The veterans all over New Greenwood school 40, Hurd school 39, seven as president. He said:

Great Railroads Awaken New Interest in Farming

A LBANY, N. Y.—The fact that the New York Central and other railroads in the state have awakened to the importance of agricultural development and are taking an active part in this work was emphasized at a session of the New York State Agricultural Society, which is holding its annual meeting in this city.

Speaker Wadsworth, the presiding officer, called on several prominent railroad men, who gave informal takis.

PORTLAND, Me.—In line with what is being done by the great railroad systems of other states, an industrial department is to be established by the Maine Central railroad, with trained workers and a large force of clerks.

The department will conduct a comprehensive system of operations covering the entire state, and having for its object the development of the natural resources and improvement of existing conditions in connection with agriculture, fruit culture, stock raising, poultry keeping, dairy interests, the development of water power, the establishment of manufacturing industries and the securing of new owners for old farms.

WASHINGTON-President Taft is cessful." appy over the assurance given him by Senator Aldrich that a postal savings bank bill would be enacted before Congress adjourned; also that the conservation measures would be taken care of. An opinion prevails in Senate and House quarters, however, that the conservation bills cannot be enacted into law at this session, and that if a postal savings bank bill is accepted, it will be in a very mild form.

The President however, refuses to accept any such view. He is confident that at the right time Senator Aldrich will set the legislative wheels in motion. There is quite a sentiment among western men favoring an issue of certificates of indebtedness for irrigation projects.

Many of the senators and representatives from that section are willing to vote for such a provision, although the support for an out and out bond issue, such as the President recommended, especially for an issue of \$30,000,000, is

The President is a little impatient over the delay in taking up the interstate commerce bill. For some reason, the Senate and House leaders are willing to postpone consideration of that measure till into February. The Senate is now unwilling to take it up till after Senator Aldrich returns from the South.

Years, but Business at Pres-

BIG ORDERS BOOKED

ent Is of Large Volume.

Several leading New York banking authorities profess to have absolute in formation of a forthcoming stock dividend on Pullman's \$100,000,000 capital stock.

It is now nearly three years and a half since Pullman declared its last stock div. idend, and New England stockholders, who number well over 6000, have already JOHN M. GRAHAM, President begun to inquire as to how soon another melon cutting might be expected.

At the same time it deserves to be re membered that two of the three years since the last dividend have covered a panic period when the earnings of all car equipment companies have suffered more severely than almost any other form of industrial corporation. Consequently the company instead of piling up surplus at the rate of rising \$4,000,000 Boston & Albany 230 1/2 231 1/2 230 1/2 231 1/2 per annum has been content to show an average gain of about half that amount for the two fiscal years ended June 30, 1909.

It is difficult to see how Pullman, if directors are determined to force a stock Union Pacific191% 193% 191% 193% dividend at this time, can possibly pay TELEPHONES. more than 10 per cent, which is small for Pullman. In November, 1906, a 36 per cent stock dividend was paid and since organization stock dividends to the amount of nearly \$80,000,000 have been paid to the company's fortunate shareolders

On June 30 last surplus stood at \$9,-995,000. The six months ended Dec. 31 was a season of great prosperity, but even so it is not safe to estimate present Live Oak surplus at much over \$12,000,000, or say 12 per cent on the total outstanding stock

Pullman is at present earning between 15 per cent and 16 per cent on its stock. New Baltic ... Only Copper . This is before allowance for depreciation. which may safely be placed at a minimum of \$3,000,000 per annum based on Rawhide Mining

he precedent of previous years. Ray Central Ray Cousol Pullman is having a splendid year's Rhode Island Coal the precedent of previous years. business in its passenger car plant, with Santa Ysabel orders on hand sufficient to keep the fac- South Lake tories in full operation for at least 12 Superior Globe are still few and far between and the Vulture big new steel car plant is not yet com- Yuma

ment, which is after all the backbone of the income account, continue of record proportions, which means of course that net profits for the current fiscal year will in all probability establish a new high 1114 water mark.

TONNAGE HEARING TO BE CONTINUED

WASHINGTON-The interstate commerce commission has announced that a further hearing will be held at Chicago on next Tuesday in the matter of the substitution of tonnage at transit points. March This is a continuation of the two-day

The commission will also hold hearings at Knoxville and Memphis, Tenn., and at Boston, Mass. At the southern hear. port was being given by the right peoings the evidence will be largely on the ple. It may be well, however, to mainsubstitution of lumber tonnage and the tain a trading position for a while longer, discount half of 1 per cent to 41/2 per transportation of the same product will buying on slight recessions and liquidat- cent. The 5 per cent rate had been in be considered at the Boston hearing. The ing on bulges. dates for the southern and eastern hearings have not been set.

DIVIDENDS

The directors of the Laurel Lake mills have declared a quarterly dividend of 2 per cent payable Feb. 1.

The Royal Bank of Montreal has in reased the dividend from 10 per cent to 11 per cent, to take effect with the next dividend payment, April 1.

The Helena Light & Railway Company declared a dividend of 1% per cent on its preferred stock, payable Feb. 1 to

The Boston & Montana Consolidated Copper and Silver Mining Company has declared the regular quarterly dividend \$1 a share. The directors of the Troy Cotton &

Woolen Manufacturing Company have declared the regular quarterly dividend of 3 per cent, payable Feb. 1 to stock (Another dividend, in liquidation, of 40

JAPAN NEGATIVES PLANS OF MR. KNO

(Continued from Page Oue.)

bankers take over the Manchurian railsure the "open door" for the merchants of all nations in Manchuria.

No intimation of the contents of the the declination to accept the neutraliza- in all to 25,758 square feet. tion proposition is based on several grounds the chief of which are:

The American plan would be of no advantage whatever to Japan.

It would afford no advantage to China. It would not change the commercial open door and equal opportunity.

It is understood that the reply is conched in terms of friendly appreciation an argumentative character and its conclusions are not qualified.

ST. PETERSBURG-Russia's reply to Secretary Knox's note proposing the neutralization of the Manchurian railways was delivered to American Ambassador Rockhill today. It rejects the proposal for the neutralization of existing railroads. It also states that the Russian government considers the alternative proposition for its participation in an international syndicate for the construction of the Chinchow-Aigun line acceptable in principle but because of the polit ical and strategical importance of the enterprise and its bearing on the East Chinese railroad, Russia will defer a final answer on this subject pending the receipt of information as to the principles of the American project. Russia re serves the right to pass upon all such projects as affect its political, strategic and economic interests.

Plan of the United States Was to Put End to Disputes

WASHINGTON-Secretary Knox's desire was to climinate the troublesome "railway zones" in Manchuria, the administration of which has given rise to seemingly endless discussion between China and Japan and China and Russia, in all of which discussions China, according to the view of disinterested western nations, came off second best.

It was proposed by Secretary Knox that Russia hand over the Chinese Eastern, and Japan the South Manchuria railroad, to China, under an agreement which should keep toose railroads open to international commerce. The administration of the railroads, likewise that of the municipalities within the railroad zones, and the policing of the lines, would be in the hands of the Chinese imperial authorities, to be delegated as the Peking government saw fit, so that the terms of the agreement regarding neutrality and equal opportunities for all administration its support and aid. nations, were respected.

The funds for financing the transfer and for the operation of the railroad SEEK LICENSES lines, according to the plans of Secretary Knox, were to be furnished by an international syndicate, consisting of American and European bankers, upon securities furnished by the Chinese government and accepted upon the approval of their presented a petition to Governor Dra-

PEKING-An imperial rescript is issued approving the preliminary agreement signed at Mukden on Oct. 2 by Willard D. Straight, the American consul-general, the British representative and the viceroy of Manchuria for the construction of the Chinchow-Aigun railway in Manchuria with capital provided by a group of American financiers. It was also agreed regard to any of the matters about that the road should be built by the

Pauling Company, British constructors. American engineers and a proportionate share of American materials are to be used. The ultimate cost of the road is estimated at from \$40,000,000 to \$50,

The unwisdom of being ill-prepared for is again a handwriting on the wall which war is plain. Battleships are, as it were, the price of a bloodless war; for if we war, is doomed. There are many signs have enough of these we shall not pay the heavier tax which actual war, are losing faith in the world's awakening. Men the heavier tax which actual war exstorts. The preparation is that tribute to Caesar which the great prescher of peace statistics to show the waste in preparaapproved, paid to buy the quiet for going the paths of those higher things with which Caesar had no concern. War rises from those same selfishnesses in human nature which allow the waste of the national resources of every sort. Not by cutting off war shall the human family learn to be brothers. When brotherhood is learned war will cease. Meantime it is well to consider such an array of figures as was lately presented by Robert C. Root, peace commissioner, before the teachers institute at Los Angeles. Since experience has proved that it is the man back of the gun that counts, then the educational systems of a country are no mean part of the national defenses. The discrepancy befrom Burns tween the expenditures for the higher and the lower means of defense is certainly very great. Mr. Root said: "To those who have eyes to see there

Our own advancement must be meas

nificance for those who read their title clear to better than earthly mansions. The little child with wings and a sword and a shield bearing the name "Life" stands on high in a flood of glory. Before the rays of this sunburst are fleeing all sorts of dark shapes-injustice, tyranny, corrupt politics, hypocrisy, greed, melancholy, quackery, cruelty, worthless tradition, snobbery. At the very end of the scurrying procession, who have all turned their backs in flight, is a woman's figure still upright and still as she goes turning back to threaten the light with her uplifted umbrella. She is labelled "Mrs. Grundy." Evidently this little champion of brighter, bigger, better and busier times for good on earth sees that the fear of other folks' opinion is the last of human follies to linger before the coming of higher hopes. We may all be very sure that when we have reached the point where the world's praise or blame has nothing to say to us, because it finds nothing in us, the millennium, for us at least, is

Japanese Cherry Trees

The interest taken in the cherry trees of which the Japanese make so much ecount should go at least a little way toward reassuring those who complain that Americans have before altogether materialistic and care only for money It is certain that a century, and indeed half a century ago, the idea of bothering with cherry trees which do not produce cherries would have been looked upon as wholly impracticable and ridic ulous altogether. But today, in New York, in Washington and elsewhere, the arrival of these fruitless cherry trees is looked forward to with eager interest while in every section of the country the hope is entertained that the trees may be so multiplied by cuttings that their peculiarly beautiful blessoms shall be a feature of every landscape. All this, too, without the thought or possibility of a single dollar of profit to individuals or communities. Evidently some things besides the love of money have been de veloping in America. The trees which the Emperor of Japan has sent over as a gift to Mrs. Taft in remembrance of President Taft's great enjoyment of the cherry blossom festival season, when in Japan, have now reached Washington. There are three carloads of them, and all the way from Japan the greatest care was taken that the temperature about hem should be kept as even as possible.

As a result it is asserted that they are in perfect condition. Mrs. Taft has already given instructions that the trees be delivered to the District sommissioner and rows of the trees lining the Potomas boulevard will be a striking feature of that imposing thoroughfare. It is to be hoped and confidently expected that before many years Washington may have its cherry blossom festival season.

Early Mail Service in Maine

In 1703 individuals hired a man to go from Castine to Wiscasset and carry letters and papers once a fortnight. He walked the whole distance over the route. The next year postmasters were appointed and mail sent once a week by carriers on horseback. Rufus Crane, the irst postmaster in Warren, collected 20 ents as his pay for his first three nonths of work.-Lewiston Journal.

THE CHRISTIAN SCIENCE MONITOR

"First the blade, then the ear, then the full grain in the ear."

EDITORIAL

Boston, Mass., Friday, January 21, 1910.

Beef Raisers and Beef Consumers STOCK-RAISERS of the country, who have just been in convention in Denver, have expressed little sympathy with those phases of the agitation against the high cost of living that are most frequently featured in the newspapers. Their reasons for withholding their sympathy may be simply and briefly stated. We export \$2,000,000 worth of beef annually, and we do not import any. There is a great demand for our beef abroad,

and among people, generally speaking, who are less able than we are to meet high prices. The reason why the foreign consumer can afford to pay the prevailing high prices for beef—and if he did not pay them the beef would not be imported by foreign countries—is that he buys with an eye to economy. He does not, as we do in this country, select the porterhouse and the sirloin—the fine rib roasts and the fancy cuts—and let the rest go. It is the waste caused by our system of housekeeping, say the stock-raisers, and not any combination or conspiracy to "boost" prices; that is mainly responsible for our high cost of living. Good housekeeping, which includes good cooking, they say, will solve the problem better than agitation or legislation—and in a manner more satisfactory to them. If the product of the animal could be disposed of more uniformly the stock-raisers would make more from moderate prices than they do now from prices that are high.

It is not only at this juncture that the household waste, the kitchen waste, the table waste of this country has been pointed out and commented upon by observant visitors and economists. We have been all over this question before. The only difference now is that it appears in a more aggravated form to ourselves. The American garbage can has long told a story calculated to astound the prudent and competent European housewife. It has been by no means lost, either, upon the prudent and competent housewives of our own

Beef is only one of the articles with which we are extravagant and wasteful, as it is only one of the articles entering into the present controversy; all other articles of food are affected relatively. There are, of course, other causes of the advance in prices.

But when all is said, the blame for the conditions that cause the present high prices rests largely with the consumer, as the remedy lies mainly in his hands.

IN MAKING it pretty clear that he is indifferent to a second term in office, perhaps President Taft is assuming just the attitude best calculated to bring such a result about.

Our relations with Canada are getting closer and closer, and we find more intimate commercial acquaintanceship mutually beneficial. According to official figures of the bureau of statistics, the highest record ever made in trade between Canada and the United States was that of the last calendar year. During the last ten years this trade has more than doubled. Imports from Canada in 1899 aggregated \$35,500,000, while in 1909 they

Our Trade With Canada

had increased to \$88,000,000. In the same period the exports from the United States to Canada increased from \$86,000,000 to about \$190,000,000. Canadian official statistics show that in 1909 of all Canadian imports 60.4 per cent were from the United States, compared with 46.08 per cent in 1889.

These figures go to support the argument that the lines of least commercial resistance for this country run north and south rather than east and west, and that it would be well for us to cultivate the trade of the western hemisphere more, instead of giving the greater part of our attention to Europe and the east. Statistics from the south sustain this contention. Altogether, the merchandise bought from and sold to its neighbors in North America, South America, Central 'America and the West Indies by the United States in 1899 was valued at \$420,000,000. Incomplete returns indicate that this business in 1909 amounted to about \$875,000,000. Mexico's 15,000,000 people bought from us last year considerably more than twice as much as did Japan's 50,000,000, and Canada's 7,000,000 bought more than four times as much as China and Japan combined.

THE attorney-generals of eight Mississippi valley states are going to get together soon for the purpose of finding out, if they can, why the so-called meat trust has put prices up so high. Since the meeting is to be held in the capital city of Missouri its attitude toward the trust will no doubt be voiced in the slogan so popular in that state, "You've got to show me."

An Awakening Influence in Cities The champions of commission government, and their number is constantly increasing, for the sake of the worthy cause they have at heart should avoid making claims that are without certain support, and that may eventually disappoint those whom their propaganda has influenced. The tendency to magnify the commission system and to minimize the part of the human factor in making it work out successfully is too great. We are told

in a current magazine article, for example, that the commission form of local government performs "the miracle of making dead cities wake," and Galveston, Tex., Des Moines, Ia., and Leavenworth, Kan., are referred to as evidence of the truth of the assertion. Galveston, it is unnecessary to say, was never a dead city; when it adopted the commission form of government it was stunned by a catastrophe. The people of Des Moines will not be thankful for the reference to their city. When Des Moines adopted the commission form of government it was very much in need of a municipal house-cleaning, but it was also a busy and a progressive community. The ease of Leavenworth was somewhat different from that of the others. Kansas City, Atchison, Topeka and St. Joseph, for reasons very natural, but which would take too long to describe, forged ahead of Leavenworth and to her disadvantage. The form of her government had little to do with the arresting of her growth.

All this in the interest of the truth. It does not, however, affect

the fact that commission government has been of very great benefit to those three cities and to many others that have adopted it, or the proposition that it will benefit any community that adopts it with the right understanding. In Galveston, the originator of the system, in Des Moines, which improved upon it, and in Leavenworth, which adopted the Des Moines plan, commission government has enjoyed the immeasurable advantage of having behind it the enthusiasm, force and fidelity of the best citizenship of the communities. With these awakened, there could be only one result. Each of the cities named has gone forward with leaps and bounds. Wherever similar causes operate, similar results must follow.

The great merit of the commission system is that it offers opportunities for civic activities, with inducements for good citizens to take part in them. But let no community imagine that the system of itself will work miracles. Success cannot be assured to municipalities any more than to individuals by automatic process. The commission system must be backed by civic pride, civic ambition and civic loyalty, if it would be saved from the ruts and pitfalls of the old form of municipal government.

To

Encourage

Growth of

Timber

One of the matters brought before the conference of the National Civic Federation just held in Washington, was a plan to encourage the growing of timber in the United States. The supply for manufacturing purposes, insufficient in several states, is yearly getting less. The lumbermen desire that a law be enacted providing that no tax of any kind be paid on timber or on timber land until the trees are manufactured into

land until the trees are manufactured into lumber. The National Conservation Association would tax timber only when cut, with an annual tax on the land on which it grows. Some discussion took place, but further information on the subject is expected from an inquiry as to the amount of standing timber in the country. Government bureaus have undertaken this investigation. It is an enormous task. The result will doubtless reveal important facts bearing on growth of timber, conservation and manufacture.

A Massachusetts report, fresh from the press, shows for woodlot owners who are looking to the future what kinds of timber promise the best returns. The state grows only two woods in sufficient amounts to supply its manufacturers, and these are the little-used species, yellow oak and applewood. Pitch pine makes the next nearest approach to supplying the home market, and falls 17 per cent short. The report, which was prepared by H. U. Maxwell of the United States forest service under direction of State Forester F. W. Rane, says:

Massachusetts is still a white pine state. It has always been that. The original forests contained some of the finest white pine ever cut in America; but the virgin stand was felled long ago, and the second, third and perhaps fourth growths are now being drawn upon. How well the demand is met is indicated by the fact that the present cut of this wood greatly exceeds the combined cut of all others in the state. . . Yet Massachusetts is not now producing half the pine demanded by home factories. Fifty six per cent of the total quantity comes from other states, some of it from as far West as Michigan. Large areas of vigorous young growth are coming on, and, with better protection from fire than formerly, there is promise of a substantial gain.

The interesting statement is made that if no outside lumber were obtainable, boxes alone would consume 94 per cent of the whole lumber cut of Massachusetts. One third of the manufacturers of wood in the state make boxes. We grow only one per cent of the black walnut we use. It was once popular for furniture, but Massachusetts now puts more of it into brush backs than into furniture. Cheapest of the woods reported was cottonwood, at \$9 a thousand, cut in Massachusetts and paid for as logs at the factory. The document is valuable in giving the producer a better idea of what is required for manufacturing purposes, and the inquiry will doubtless benefit the industries of the state.

Back to the Soil Among the influences that are at work calling the people "back to the soil" must be reckoned the magazines and other publications that are now being issued for the purpose of setting forth the charms of farm and garden and exploiting country life and all that pertains thereto. To those cooped up in narrow city houses few publications could appear more enticing than those wherein the illustrations show shady country lanes, fields of corn and

clover, orchards bending beneath burdens of fruit, gardens wherein grows every kind of flower and vegetable, poultry yards and houses filled with plump chickens and nests overflowing with fresh eggs. To read of all these delights is to be convinced, and to act on the conviction is most natural. Photography, the splendid half-tone engraving process, fine paper and good printing properly utilized and combined make a transcription of rural life that is well-nigh irresistible. If nature does not always come up to the artist's standard of beauty and excellence, she will, if encouraged and offered anything like a fair chance, do her part toward giving all who cultivate her good graces a splendid return for their time and labor.

Wordsworth tells us: "Nature never did betray the heart that loved her." But if one does not love her she has no message for him. From such an one she hides the charm of field and sky. Her voices shall not be music in his ear. He shall find her wearisome and unprofitable. She has smiles only for those who have warm words for her. Even though ventures in farming may frequently prove unsuccessful from a financial point of view, there are recompenses that serve to offset the monetary losses. It is worth something to sit under one's own vine and fig-tree, even though these may not be prolific producers and may fail to yield a return in fruit equivalent to the time, the labor and the fertilizers bestowed upon them. To pick a fine dinner of peas or beans from one's own garden cultivated by one's own hands is a joy that cannot be intelligently described to those who have had no such experiences. A tomato in one's own garden is worth a whole peck that the greengrocer can bring, and no other rose is quite so sweet as the one that blossoms at the side of one's own door. To see a rose-breasted grosbeak or a Baltimore oriole swinging like a flame of color in a cherry tree snowy with bloom is to feel'an exaltation that really stands for more, in the reckoning of a true nature lover, than a full crop of potatoes or a superabundance of beets and turnips.

So just now, early as it is in the year, there are thousands who are studying these guides to gardening and farming and who are waiting the coming of spring to hie themselves away to the country, where at least some, perchance, if not all of their fond dreams are to come true.

IBRAHIM HACKI BEY is the first grand vizier called by the first constitutional Sultan. He will be one of the most striking holders of that great office if antecedents count for anything. From simple bey to grand vizier with the title "highness" is an extraordinary leap even from the stepping stone of the ambassadorship to the Quirinal; but it is quite in keeping with the unique career of this versatile jurist. Like Kutchuk Said Pasha,

The New Grand Vizier Hakki Bey began his career as palace secretary, a generation ago. Could there be any position less likely to lead to a constitutional prime ministership than one involving apparently close association with palace spies and other tools of despotism? As a matter of fact, it did fit him precisely for the mission he is now undertaking. Such were the talents displayed by the young bey that he became the originator and director of the imperial bureau of translations, where not only political and diplomatic documents but also the most notable works of foreign literatures were translated into Turkish for the Sultan and his entourage.

The result was that Hakki Bey in the midst of Turkish orthodoxy became thoroughly imbued with occidental culture, and this to a far greater extent than many of the exiles who adopted western ways in France and England but failed to assimilate western thought. He and Turkhan Pasha, now ambassador to St. Petersburg, were the only Turkish officials in Stambul who, under the eyes of Abdul Hamid, dared to live entirely in western fashion, frequenting almost exclusively European houses and entertainments. The late Sultan found Hakki Bey so indispensable at Yildiz Kiosk and later in the foreign office that he was willing to overlook the aggressive frankness with which the bey exhibited his liberal and thoroughly modern ideas, notably as professor of international law at Constantinople. It was this courageous progressiveness of a pioneer of freedom that earned for him the respect and friendship of the leading Young Turk conspirators. They selected him, when their time came, for the post of minister of education in the first constitutional cabinet under Said Pasha and for that of the interior under Kiamil Pasha. He was even then spoken of as a future grand vizier.

Ibrahim Hakki Bey—now H. H. Hakki Pasha—is reputed to combine diplomatic gifts with executive ability in such rare measure as to be preeminent among the younger public men of modern Turkey. For breadth of intellect and strength of character his supporters have compared him to the great Midhat Pasha himself, the father of Turkish liberty. Whether this is an oriental hyperbole or not, it is becoming more and more manifest that only he on whom the mantle of Midhat has fallen can lead the Ottoman nation out of equivocal, compromising, confused irresponsibility into full constitutional freedom.

THE Cleveland workmen's boycott of meat is said to be proving successful and dealers in trying to sell their cuts are cutting their prices. If the public shall insist upon going on a vegetarian diet it looks as if the meat dealers will have to lay in a stock of cabbages if they wish to keep a-head.

Waterpower Sites and Their Uses The deeper one penetrates into the mazes of the conservation movement the more paradoxes and contradictions one encounters. The solemn and depressing announcement that our soil was wearing out, for example, has been followed by assurances from scores of learned men to the effect that our soil is good for thousands of years to come, and that all it needs, even when it looks its worst, is intelligent treatment. Our forests? They

are not what they once were, of course, for they have been taxed to meet not only the needs of white settlement in these states but the destruction that marks the progress of civilization. Nevertheless, with it all, we are far from being as short of timber as some would have us believe; moreover, as we go along we shall need it less and less, and its growth will gain on us as deer have gained on the people of New England. Mines? We are employing processes today that are extracting more from the dumps than the Argonauts of '49 were able to dig out of the ground.

We have in sight the possibility of creating ten times as much waterpower as would be required to run all the machinery of all kinds at present employed in this country, including that engaged in the generation and transmission of electricity. An article in these columns a few days ago referred to the construction of a great dam at Keokuk, Ia., the purpose of which is to provide that city with light and power. This has served to call attention to the fact that the waters of three of the greatest rivers in the world-the Mississippi, the Missouri and the Ohio-along which thousands of light and power plants might be erected, are flowing idly to the sea. Strangest of the revelations, however, is that with all of our agitation and excitement over waterpower sites during the last few years, an official report declares that waterpower has not held its own, but has steadily declined in relative importance since 1870, when it was 48.2 per cent of the whole horsepower of the country, whereas for 1905, it was only 11.3 per cent. According to reports for the latter year, 1,647,969 horsepower generated by running water was then employed in mechanical industries. Of this about 40 per cent was in New England and 27 per cent in the state of New York.

What the coming census may show as to waterpower development is uncertain, but there is no reason to believe that it will show such growth in the employment of waterpower sites by public or private interests as to justify the fear that the supply will be materially reduced within the present or the next generation. The lesson, of course, is that while we should husband our natural resources more carefully in the future than we have in the past, there is no reason in the world why we should become panic-stricken with regard to them now.

WITH Former President Roosevelt as a member of the House, and its speaker, the United States Senate might find itself a secondary attraction for the many sightseers who visit Washington. Even the White House, as a center of attraction, might have to do a little advertising in order to keep itself in the limelight.

With the girls attending most of the women's colleges raising money for the striking shirtwaist makers, the matter would seem to be resolving itself into an educational as well as an industrial question. The strikers appear to be touching not only the sympathies but the purses of their sisters in all walks of life.
